PROFESSIONAL SUMMARY

Product Engineer with a BSc in Computer Science and an MSc in Interaction & Experience Design (University of Limerick), and 3+ years across front-end development, UX, data engineering and IT operations. Works across the whole product: from talking to users and shaping requirements to building the interface, the data layer and the delivery pipeline. Raised core feature adoption by 40% and cut production time by 15% with a shared component library at Aspira; built automated reporting pipelines on Google Cloud and supported 1,000+ users at 95%+ SLA at Infosys. Currently building VISE, a cross-platform budgeting app with a Rust and SQLite core, using AI tools daily to speed up the work while reviewing everything they produce.

SKILLS

- React, React Native & Expo
- Rust
- ETL & data pipelines
- Debugging & root-cause analysis
- User research & usability testing
- TypeScript & JavaScript
- Python & PHP
- CI/CD (Jenkins, GitHub Actions)
- Tableau & Power BI
- Requirements gathering
- REST APIs & JSON
- SQL (MySQL, PostgreSQL, SQLite)
- Google Cloud (GCP) & AWS
- Design systems
- Cross-functional collaboration

WORK EXPERIENCE

Freelance (Peter's Restaurant, AJ Auto Spa) — *Sep 2025 – Present | Ireland*

Product Engineer & Business Consultant

- Designed, built and shipped live digital menus and in-store displays now used daily by customers at 2 venues, and fixed QR ordering failures on Android that were losing orders.
- Spent time on site at Peter's Restaurant mapping 15+ touchpoints across dine-in, takeaway and delivery; the changes that followed improved efficiency by about 20% and cut service delays by 15%.
- Worked with AJ Auto Spa on online content and campaigns, growing reach by over 40% and helping bring in around 20% more customers.

Aspira — *Mar 2023 – Apr 2024 | Chennai, India*

UX/UI Designer

- Took enterprise features from research and wireframes through to production React interfaces; core feature adoption rose by 40%.
- Set up a shared component library and helped 5+ developers switch to it within 2 sprints, cutting production time by 15%.
- Built and tested the registration and login back end with Python, PHP and MySQL, making onboarding about 20% faster.
- Ran usability tests, A/B tests and design reviews, mentored junior designers, and improved WCAG compliance by 25%.

Infosys — *Jun 2021 – Nov 2022 | Chennai, India*

BI Administrator

- Built ETL pipelines and SQL data models on Google Cloud (BigQuery) as part of ITOM and systems integration work, so reporting ran automatically and close to real time.
- Helped run CI/CD in Jenkins for builds, tests and deployments, reducing process delays by about 7%.
- Administered ServiceNow and configured its incident and change workflows in line with ITIL, which shortened resolution times.
- Supported 1,000+ users with networking, VPN, Microsoft 365 and Active Directory issues, keeping a high volume of tickets at 95%+ SLA.
- Received an Excellence Award for tracking down the cause of repeated P1 incidents and fixing it with a dedicated server.

SELECTED PROJECTS

VISE: Offline-First Budgeting App | Aug 2026 – Present

- Building a cross-platform budgeting app with a React Native, Expo and TypeScript front end and a Rust core that handles budget logic, analytics and spending predictions, storing data on-device in SQLite.
- V1 now in Android testing with real users: onboarding and 5 core screens run on real data, with budget maths unit-tested and checked in GitHub Actions CI.

Hybrid Work Experience Planner | Jan 2026 – Feb 2026

- Surveys with 30+ employees and 8 stakeholder interviews shaped a planning tool that reduced scheduling conflicts by about 40% and was adopted by 50+ people.

Remembering What Matters | Nov 2025 – Dec 2025

- A 20-user survey shaped an end-of-trip confirmation and reminder flow for ride-hailing apps that reached a 90% recall rate in testing.

Assist Now: Dashboard Redesign | Apr 2023

- Redesigned a customer analytics dashboard, simplifying complex timelines and metrics to reduce task oversight by about 30%.

EDUCATION

University of Limerick — *Sep 2025 | Limerick, Ireland*

MSc Interaction and Experience Design

SRM Institute of Science and Technology — *Apr 2021 | Chennai, India*

BSc Computer Science
