PROFESSIONAL SUMMARY

UX Engineer with an MSc in Interaction & Experience Design from the University of Limerick and 3+ years' experience across front-end development, UX research and data/BI. I design and build accessible, responsive interfaces in React, React Native and TypeScript, grounded in user research, usability testing and WCAG 2.1 AA. Currently building VISE, a cross-platform budgeting app, and delivering service design for hospitality and automotive-service clients in Ireland.

SKILLS

Design: Figma, Framer, Adobe XD, Miro, Balsamiq, Wireframing, Prototyping, Interaction Design, UX Writing, Canva

Research: User Interviews, Surveys, Usability Testing, A/B Testing, Heuristic Evaluation, Journey Mapping, Service Blueprints

Engineering: React Native, JavaScript, TypeScript, HTML5, CSS, Tailwind CSS, Bootstrap, REST APIs, JSON, Git/GitHub, WCAG, Responsive Design, React, State Management

Data: SQL, Google BigQuery (GCP), Tableau, Power BI, ServiceNow, Data Visualisation, ETL

WORK EXPERIENCE

Freelance (Peter's Restaurant, AJ Auto Spa)

Sep 2025 - Present | Ireland

Freelance UX Engineer

- Designed and deployed responsive digital menus and interactive displays across 2 client venues, reducing ordering friction and standardising cross-platform visual assets.
- Conducted on-ground analysis at Peter's Restaurant using Miro for journey mapping, identifying gaps in customer flow, billing, and delivery operations, improving process efficiency by ~20% and reducing service delays by 15%.
- Resolved QR ordering and navigation failures across Android devices, eliminating digital ordering drop-offs and restoring reliable digital access for customers.
- Developed service blueprints and customer journey maps using Miro and Figma for Peter's Restaurant, mapping 15+ touchpoints across dine-in, takeaway, and delivery operations to identify friction points and streamline end-to-end service delivery.

Aspira

Mar 2023 - Apr 2024 | Chennai, India

UX/UI Designer

- Built and shipped end-to-end UX for enterprise digital platforms, translating user research and cross-functional requirements into responsive, production-ready React interfaces, increasing core feature adoption by 40% across key enterprise workflows.
- Ensured all designs met WCAG accessibility standards using HTML5, CSS3, and responsive design principles, improving accessibility compliance across all delivered interfaces.
- Developed responsive, mobile-first front-end components using React.js and TypeScript, bridging the gap between design and development to streamline implementation.
- Contributed to an agriculture support app (authentication, user management, ordering, data security), improving usability across core user flows.

Infosys

Jun 2021 - Nov 2022 | Chennai, India

Operation Executive

- Sole owner of the Tableau ecosystem end-to-end, maintaining 100% uptime and delivering 20% faster server performance through proactive troubleshooting.
- Designed business-aligned dashboards that improved organisational decision-making by 25% and platform adoption by 40%.
- Led migration from on-premises Tableau to Google Cloud (BigQuery), optimising data pipelines for efficient JSON parsing and API integration to support real-time reporting.
- Built and maintained ETL pipelines and SQL data models, with data-quality checks and root-cause analysis to keep business-critical data reliable.

EDUCATION

University of Limerick	MSc Interaction & Experience Design
Sep 2025	
SRM Institute of Science and Technology	BSc Computer Science
Apr 2021	

PROJECTS

VICE- Personal Budgeting App

Aug 2026 - Present

- Own UX, UI and front-end development for income, budget, category, transaction, and financial prediction modules on VISE, a cross-platform personal budgeting app for Web, iOS, Android, and Tablet.
- Designed and built responsive, accessible UI components and a consistent design system using React.js and React Native, applying simple layouts, strong typography, and WCAG 2.1 AA patterns.

Product & UX Design Challenge

Aug 2026 - Sep 2026

- Completed a practical UX/UI design task focused on creating a responsive landing page for Flex Academy, including UX structure, visual direction, and conversion-focused content hierarchy.
- Developed desktop and mobile layouts with a cohesive design system, clear CTA hierarchy, and responsive design principles.

Hybrid Work Experience Planner

Jan 2026 - Feb 2026

- Designed a data-driven hybrid work planning tool optimising scheduling and collaboration. Surveys with 30+ employees and 8 stakeholder interviews reduced scheduling conflicts by ~40%, adopted by 50+ team members.

Remembering What Matters – Ride-hailing lost-item prevention

Nov 2025 - Dec 2025

- UX case study preventing lost-item incidents in ride-hailing apps via end-of-trip confirmation and dual reminders. Survey of 20 users (70% reported incidents) informed design; 10-user test achieved 90% recall rate.

Balanci: Designing for International Students' Work-Study Balance

Sep 2025 - Oct 2025

- Applied probe methodology and user-centred design to research international students' work-study balance challenges. Mapped end-to-end student journeys and created service blueprints, resulting in a prototype application featuring a widget tool designed to support their daily management and wellbeing.
